Strategic Cybersecurity Practitioner | Army Veteran | Risk Mitigation & Vulnerability Assessment

Seasoned leader with 14+ years in high-tempo, mission-critical environments. Skilled in vulnerability assessment, risk mitigation, and strengthening digital infrastructure resilience. Active ISACA and ISSA member committed to advancing privacy protection and cybersecurity readiness.

Education

- **Master of Science in Cybersecurity**, Cyber Operations (Expected May 2026)
ECPI University GPA 4.0
- **Bachelor of Science in Computer Science**, Cybersecurity & Information Security Technologies January 2025
ECPI University Summa Cum Laude

Professional Experience

ECPI University – San Antonio, TX

Information Systems Assistant | Sep 2023 – Sep 2024

- Provided technical support using Active Directory ensuring data confidentiality and availability for 30+ users.
- Resolved system issues through hardware/software troubleshooting, minimizing downtime and improving performance.
- Conducted policy development and curriculum support, reinforcing compliance and security best practices.

U.S. Army

Planner / Operations Sergeant Jan 2017 – Aug 2018 *Instructor / Platoon Sergeant* Sep 2014 – Jan 2017

- Refined SOPs to strengthen incident handling and readiness, enhancing mission-critical systems.
- Coordinated personnel/resources for multinational operations, surpassing benchmarks through structured planning.
- Enhanced training protocols to bolster system administration expertise and promote efficient incident response while reinforcing international collaboration.
- Directed training for 51 personnel, embedding risk management and incident response drills into daily operations.
- Managed \$7.8M in equipment, ensuring operational compliance and mission readiness.
- Led interoperability exercises across NATO allies, applying network security principles to improve joint operations.

Selected Projects

- *Research Publications* – researchgate.net/profile/Hector-Borges-3
- *Enterprise Security Architecture* – Healthcare Network: Designed HIPAA/NIST-aligned Zero Trust framework, integrating SIEM and incident response for six hospitals.
- *Active Directory Deployment* – Medical Group: Engineered secure multi-site AD with PKI and GPO hierarchies, improving identity lifecycle controls and compliance.
- *AI for Anomaly Detection*: Built autoencoder model for log monitoring and insider threat detection, improving detection accuracy by 22%.

Technical Skills

- *Security & Compliance*: Network Security, IAM, Policy Development, Incident Response, Firewall Configuration
- *Systems & Administration*: Active Directory, Linux, Technical Support & Troubleshooting
- *Programming & Tools*: Python, Network Scripting, Database Management, TensorFlow, PyTorch, Power BI
- *Emerging Technology*: AI/ML

Certifications & Training

- CompTIA Security+
- Lean Six Sigma Yellow Belt
- NVIDIA – Generative AI with Diffusion Model
- NVIDIA – Application of AI to Predictive Maintenance
- NVIDIA – Anomaly Detection
- NVIDIA – Deep Learning
- McGraw Hill Yellow Belt – Microsoft Suite

Professional Affiliation

- Information Systems Security Association (ISSA)
- Information Systems Audit and Control Association (ISACA)
