

Hector J. Borges

Cybersecurity Professional • Operations Leader • U.S. Army Veteran
San Antonio, TX • hjborges@gmail.com

PROFESSIONAL SUMMARY

Cybersecurity professional, founder, and U.S. Army veteran with 14+ years of leadership experience and graduate-level training in Cyber Operations. Founder & Managing Editor of CyberSense.Solutions, a veteran-owned platform delivering daily threat intelligence, practitioner analysis, and enterprise security training. Proven ability to design and operate complex technical systems, from event-driven content pipelines and JWT-authenticated agent workflows to Active Directory administration and Zero Trust architecture. Equally at home leading people, managing operations, and building from scratch. Holds a Master's in Cybersecurity with a 4.0 GPA from an NSA/DHS-designated Center of Academic Excellence.

CORE COMPETENCIES

- **Threat Intelligence & Analysis:** Threat Intelligence • OSINT • Daily Briefing Production • Intelligence Automation
- **Security Architecture:** Zero Trust Concepts • PKI Integration • Identity & Access Management • Least-Privilege Design
- **Infrastructure & Systems:** Active Directory • Group Policy Objects • Linux/Windows Administration • SIEM Concepts • Vulnerability Management
- **Development & Automation:** Python • Node.js/Express • PostgreSQL • HTML/CSS/JS • REST APIs • JWT Auth • AI-Assisted Workflows
- **Platform Operations:** Railway • SendGrid • Cron Scheduling • Event-Driven Pipelines • 25-Table Production Database
- **Leadership & Operations:** SOPs • Personnel Supervision • Incident Response • Training Development • Multi-project Management

PROFESSIONAL EXPERIENCE

Founder & Managing Editor | CyberSense.Solutions

Veteran-owned cybersecurity intelligence and training platform

April 2026 – Present

San Antonio, TX (Remote) • 40+ hrs/wk

- Founded and launched a full-stack cybersecurity intelligence platform delivering daily threat briefings, practitioner-written analysis, and enterprise security culture content to workforce and practitioner audiences.
- Published 165 consecutive editions of the Daily Digital Awareness Briefing, growing readership to 100+ active subscribers and generating 4,000+ LinkedIn impressions across syndicated content within the platform's first quarter of operation.
- Designed and operate a production PostgreSQL database (25 tables) with event-driven pipelines, cron-triggered services, JWT-authenticated agent workflows, and scoped API permissions at the application layer.
- Built the full platform stack: HTML/CSS/JS front end, Node.js/Express back end, Railway deployment, and SendGrid transactional email – architected, deployed, and maintained independently.
- Leading phased product development across freemium, subscription, and enterprise training tiers, applying Zero Trust and least-privilege principles to application security design.
- Designed AI-assisted workflow automation for content production, intelligence aggregation, and agent coordination across a 33-role autonomous operational structure.

Information Systems Assistant | ECPI University

National Center of Academic Excellence in Cyber Defense

September 2023 – September 2024

San Antonio, TX • 20 hrs/wk

- Administered Active Directory accounts and Group Policy Objects for 30+ users, supporting identity lifecycle management and access control continuity.
- Resolved Tier 1 and Tier 2 hardware and software issues, reducing user downtime and maintaining departmental operational continuity.
- Applied security-conscious troubleshooting practices across Windows environments, reinforcing institutional data integrity and system availability.

Operations Sergeant / Platoon Sergeant / Air Operations Manager | U.S. Army
Sergeant First Class (E-7) — Active Duty, Multiple Duty Stations & Multinational Deployments

April 2004 – August 2018
40+ hrs/wk

- Led personnel and operational planning across high-consequence environments, including multinational deployments requiring real-time coordination and zero-margin execution.
- Developed and published SOPs supporting mission readiness, deployment planning, and operational continuity across diverse unit structures.
- Managed personnel readiness tracking, incident investigations, and structured retraining programs building durable skills in documentation, accountability, and organizational leadership.
- Supervised teams of varying sizes in dynamic, resource-constrained environments where clarity of mission and discipline of execution were non-negotiable.

EDUCATION

M.S. Cybersecurity, Cyber Operations – ECPI University
NSA/DHS CAE-CDE Designated

May 2026
GPA: 4.0

B.S. Computer & Information Science – ECPI University
Cyber and Information Security Technology

January 2025
Summa Cum Laude

A.S. Computer & Information Science – ECPI University
Cyber and Information Security Technology

November 2023
Summa Cum Laude

CERTIFICATIONS

- CompTIA Security+ CE
- Lean Six Sigma Yellow Belt
- NVIDIA: Anomaly Detection · Generative AI with Diffusion Models · Deep Learning · AI for Predictive Maintenance
- McGraw Hill Yellow Belt — Microsoft Suite

PROFESSIONAL AFFILIATIONS
